Confined Space Capability Statement

8(a) Exp. 12-2028, ACDBE, DBE, EBE, EDWOSB, MWBE, SBE, SDB, SDVOSB, VOSB, WOB and WOSB

WHY CONFINED SPACE SERVICES ARE REQUIRED

Entering a confined space may be extremely hazardous. Therefore, it is important that anyone who must work in a confined space, or who supervises someone who must enter a confined space, understands the hazards involved. A confined space standard - OSHA regulation 29 CFR 1910.146 - is any type of chamber such as a storage tank, transformer vault, manhole, etc., where entry or exit is restricted. Ventilation in confined spaces may also be restricted and may cause adverse atmospheric conditions such as low oxygen and a buildup of toxic vapors and combustible gases within the confined space.

WHAT SERVICES WE PROVIDE

Our staff is Authorized OSHA trainers, degreed (Bachelor, Master and PhD) and numerous other certifications in Safety, Confined Space, Industrial Hygiene (CIH), etc. Staff performing Confined Space Hazard Determinations has at least 20 years' experience each.

Confined space services:

- Hazard identification (to include exemption detail)
- Personnel Responsibilities.
- Employee Training.
- Personal Protective Equipment.
- Air Monitoring.
- Rescues.
- Potential Hazards.
- Entry Procedures.
- Permit Authorization; and
- Ventilation.

PAST PERFORMANCE

Project Description: Hazard identification (to include exemption detail), Personnel Responsibilities; Employee Training; Personal Protective Equipment; Air Monitoring; Rescues; Potential Hazards; Entry Procedures; Permit Authorization; and Ventilation.
