

INDUSTRIAL HYGIENE (IH) & INDOOR AIR QUALITY (IAQ)

CAPABILITY STATEMENT

8(a) Exp. 12-2028, ACDBE, DBE, EBE, EDWOSB, MWBE, SBE, SDB, **SDVOSB**, Iowa TSB, VOSB, WOB and WOSB

ACT Safe, LLC is a multifaceted Regulatory Compliance Service provider assisting companies with local, state, and federal regulatory compliance. We have thousands of years combined experience as former regulators and compliance managers. ACT Safe provides Environmental, Occupational Safety and Health (OSH), Engineering, and Transportation solutions. From permitting, audits, Industrial Hygiene, Indoor Air Quality, ACM / LBP, expert witness, hazard determinations, written programs, training and file plan management - we cover your needs.

INDUSTRIAL HYGIENE

Industrial hygiene services are focused on the anticipation, recognition, evaluation, communication and control of environmental stressors in the workplace environment. Such environmental stressors can include biological, chemical, physical, ergonomic or psychosocial categories and may result in injury, illness, impairment, or affect the overall wellbeing of workers and members of the community. Employers need a rigorous and professional program with independent evaluation to determine the potential for hazards, an evaluation of exposures or risk in the workplace, and recommended corrective actions. ACT Safe has a team of professional industrial hygienists as well as licensed asbestos and lead based paint technicians.

WHAT SERVICES WE PROVIDE

Our team will work in tandem with your staff to both assess and control the physical, chemical, biological or environmental hazards in the workplace or community that could cause injury or disease. ACT Safe also maintains an assortment of industrial hygiene equipment to test and assess nearly any type of indoor environment. A detailed listing of our services includes:

- Identify health & safety problems in the workplace
- Assess Engineering Controls/Ventilation
- Conduct worksite and or personal sampling and analysis for exposure levels for chemicals, lead, asbestos, silica, mold and noise
- Assess all worksite environmental stressors
- Develop and /or recommend corrective measures to eliminate hazards and prevent future problems to include engineering and non-engineering controls (to include work practices).
- Assist in developing mandated health & safety programs
- Interpret safety data sheets (SDS)
- Perform Chemical Speciation
- Determine Community Exposures and risks
- Provide a full Health Risk Analysis & Hazard Communication

OCCUPATIONAL SAFETY AND HEALTH

Air Monitoring: ACT performs both personal and area monitoring for potential air contaminants in working environments. Inhalation exposures to hazardous materials are evaluated by comparing them to Occupational Exposure Limits (OELs) that have been developed for air contaminants. Generally accepted OELs include the Permissible Exposure Limits (PELs) established by the Occupational Safety and Health Administration (OSHA), the Threshold Limit Values (TLVs) established by the American Conference of Governmental Industrial Hygienists (ACGIH) and the Recommended Exposure Limits (RELs) established by the National Institute for Occupational Safety and Health (NIOSH).

Product of ACT Safe, LLC^(SM). Materials shall not be published or redistributed directly or indirectly in any medium. Contact service@actsafellc.com with questions.

Noise Monitoring: Noise dosimeters and sound-level meter readings are used to evaluate employees' noise exposures. Employees' noise exposures are evaluated according to OSHA guidelines (or applicable state regulations). Employees whose noise exposures potentially exceed the "Action Limit" (85 dBA) must be included in a Hearing Conservation Program (HCP) and employees whose noise exposures exceed the "Permissible Exposure Limit" (PEL) (90 dBA) must also wear appropriate hearing protection until feasible noise reduction controls can be implemented.

SAFETY INSPECTION

ACT Safe, LLC personnel perform safety inspections that follow all OSHA 29 CFR 1910, 1926 and 1915 applicable standards, National Institute of Health (NIH), Centers for Disease Control & Prevention (CDC), National Institute for Occupational Safety and Health (NIOSH), Environmental Protection Agency (EPA), American Industrial Hygiene Association (AIHA), National Fire Protection Association (NFPA), National Electric Code (NEC) and the client's internal policies.

Our in-depth inspect review all exposure that pose a hazard to health and safety of the employee. Focused areas:

- Engineering Controls - Changes to the work environment to reduce hazards examples include: chemical fume / ventilation hoods, showers, eye washers, and Biological Safety cabinets.
- Administrative Controls- those that modify work schedules and tasks examples include: Chemical hygiene plan and Standard Operating procedures (example: Spill Plan, Emergency Response, OSHA HazCom & PPE program, Inventory Control plan, etc.)
- Work Practices-Procedures for safe and proper work. Proper techniques used by workers.
- Personal Protective Equipment- Protective Gear examples: respirators, face shields, goggles, disposable gloves, etc.

WORKPLACE EXPOSURE ASSESSMENT

The Workplace Exposure Assessment is the multi-disciplinary field that identifies and characterizes workplace exposures, develops estimates of exposure for exposure-response and risk assessment studies, and evaluates the significance of exposure and effectiveness of intervention strategies.

Throughout this assessment the following Occupational exposure will be performed:

- Identification,
- Characterization,
- Estimation, and
- Evaluation of workplace hazards.

PAST PERFORMANCES

ACT works for various business, industries and government agencies. To include Fortune 500 companies, local, state and federal government agencies, and large institutions. Specific sectors include aerospace, agriculture / grain, automotive, building / construction, chemical, food & beverage, general, government & public sectors, healthcare & medical, oil & gas, plastics and transportation.

- USAF (Air Force)
- Veterans Administration (VISN
6, 8, 9, 12, 13, 15 & 23)
- Merck (Pharmaceutical)
- Bureau of Reclamation
- Coleman Company
- Nestle / Purina
- Pepsi (PBG)
- Pfizer (Pharmaceutical)
- Plains Marketing L.P.
- Smithfield Foods / ConAgra
- USCG (Coast Guard)

DIFFERENTIATORS

SBA 8(a) Expiration 12-2028

Veteran Owned, Operated and staffed (Service Disable Veteran Owned Small Business - SDVOSB)
Small Business Administration certified Economically Disadvantaged Woman Owned Small Business
Local, State and Federal government contracting experienced

Our Team Members have extensive training, education and experience in their chosen discipline.

We have set on boards / commissions at the State, Federal and International level as experts in our field providing direction and input on rules and policies.
